

Maine Midden Minders and the Maine Shell Heaps

A presentation by Dr. Alice R Kelly
University of Maine Climate Change Institute

Sunday July 17, 2022

4:00 PM

Long Island Community Center

From the “Be a Maine Midden
Minder!” brochure

Shell middens “dot the Maine coast and are a rich archive of past lifeways and environments, as well as a cultural touchstone for the region’s Indigenous inhabitants”. Come hear what they are about, how climate change is impacting them, and what research is happening here in Maine. And stay to visit the Long Island Historical Society Museum exhibit about Dr. Kelly’s research.
